

HOANG TRUONG PHAM

MOBILE APPLICATION PROGRAMMER

PROFESSIONAL SUMMARY

Motivated and diligent student on the way to complete Computer Science: Programming degree. Fluent in Swift, Java, C#, HTML, CSS, Oracle, MySQL... and especially Android and IOS. School projects included building apps, optimizing programs, and validating code. I'm seeking an internship as a mobile developer to gain real-world tech experience.

EDUCATION

DEC, Computer Science: Programming, Expected in 05/2024

LaSalle College - Montreal, QC

Computer science (Programming)

- Android Mobile Application
- Algorithms and Programming
- Object-Oriented Programming
- Data Structure
- Scripting Language (Python)
- IOS Mobile Application
- Web Client-Server Development
- Information System Analysis
- Multi-tier Application Development

PERSONAL PROJECTS

Resto Inventory Clerk (Android Application)

GitHub Link: [HoangTruongSoftDev/Resto_Inventory_Clerk_Android/](https://github.com/HoangTruongSoftDev/Resto_Inventory_Clerk_Android/)

- Resto Inventory Clerk is an innovative Android app for restaurant inventory management, using the MVC model, Firebase for real-time database integration, and developed in Java with Android Studio. It provides role-based access, allowing staff to consume items, managers to manage inventory and place orders, and admins to handle accounts, ensuring data security.

French Conjure (IOS Application)

GitHub Link: [HoangTruongSoftDev/French_Conjure_Swift/](https://github.com/HoangTruongSoftDev/French_Conjure_Swift/)

- The "French Conjure" iOS app, developed in Swift, facilitates French verb conjugation with features like Object-Oriented Programming, Delegate pattern, Protocols, and dynamic UITableViews. It employs API integration to access a vast verb database, offering real-time conjugations and a user-friendly interface with search functionality and offline support. Developed using Xcode and managed with Git, this educational tool is prepared for App Store submission, aiming to simplify learning French verb conjugations.
